

Honey-B-Healthy Use

Winter

Report ID: 182-2012

A comparison of average winter colony mortality among beekeepers who reported they did or did not apply and/or feed Honey-B-Healthy to a majority of their colonies, at least once, between April, 2011 and March, 2012.

Some Significant Differences

Respondent Ratio

Interpretation

Beekeepers (27% of total respondents) who reported feeding with Honey-B-Healthy reported 3 fewer overwintering colony deaths per 100 managed colonies than those who did not report using a known feeding supplement. In other words, beekeepers who reported feeding colonies with Honey-B-Healthy lost 11.5% fewer colonies than those who did not report treating with any known feeding supplement.

Survey Question

Which, if any of the following, did you apply to a majority of your colonies between April 1, 2011 and March, 2012?
-Honey B Healthy

		Total Number of Respondents Providing Valid Responses	Total Number of Colonies Managed	Average Number of Colonies Managed		Average Colony Loss		
				Mean	Standard Error	Mean(%)	Lower 95% CI	Upper 95% CI
	Product Not Used	3,525	188,219	53.4	10.6	26.1	25.0	27.2
	Product Used	1,277	108,441	84.9	21.5	23.1	21.5	24.6
