This information is for educational purposes only. References to commercial products or trade names do not imply endorsement by the Bee Informed Partnership or its members. The results presented here are the summary of the population who responded. The sample may not be representative of the beekeeping population at large. These results simply highlight differences in the sample population. The results cannot be considered conclusive, causative, protective, or attest to product efficacy or lack of efficacy.

A comparison of average winter colony mortality among beekeepers who reported they did or did not apply and/or feed Honey-B-Healthy to a majority of their colonies, at least once, between April and March.

## Winter

Report ID: 182-2015

## Participant Ratio

## Interpretation

Beekeepers who reported feeding with Honey-B-Healthy did not lose more or less colonies than those who did not report feeding Honey-B-Healthy. In other words, there was not a significant difference.

## Survey Question

Which, if any of the following, did you apply to a majority of your colonies between April 1, 2014 and March, 2015?

-Honey-B-Healthy

		Total Number of Respondents Providing Valid Responses	Total Number of Colonies Managed	Average Number of Colonies Managed		Average Colony Loss
				Mean	Standard Error	Mean(%) [Lower, Upper] CI
	Product Not Used	3,104	198,598	64.0	12.5	42.5 [41.2, 43.8]
	Product Used	1,579	169,517	107.4	42.8	40.7 [39.0, 42.5]
