

A comparison of average winter colony mortality among beekeepers who reported they did or did not apply and/or feed Honey-B-Healthy to a majority of their colonies, at least once, between April and March.

Winter

Report ID: 182-2015

Participant Ratio

Interpretation

Beekeepers who reported feeding with Honey-B-Healthy did not lose more or less colonies than those who did not report feeding Honey-B-Healthy. In other words, there was not a significant difference.

Survey Question

Which, if any of the following, did you apply to a majority of your colonies between April 1, 2014 and March, 2015?
