Notes?								

**Frames of bees:** estimation of the adult bee population (if frame is covered front and back, it counts as 1 frame)  
**Brood pattern:** qualitative measure of the pattern of capped brood: from 0 (extremely patchy, "shot-gun" like) to 5 (full circle of brood of same age)  
**Queen status:** QS (Queen Seen) ; QR (Queen Right: did not see the queen but found eggs) ; QNS (Queen Not Seen, nor eggs, but colony looks queen-right) ; VQ (Virgin Queen: queen seen but appear new) ; DL (Drone Layer) ; QL (Queenless) ; LW (Laying Worker) ; or other if you know.
